

# It's the first impression that counts. Point-of-sale system solutions.

When the new POS system was being developed, there was one main focal point: to generate the greatest possible benefit for the trade. The high-grade, visually appealing system features numerous sophisticated details designed to make life easier for the trade – and boost sales. Thanks to its modular construction, finely tuned down to the last detail, it can be individually adapted to any showroom arrangement. Efficient, high-quality, sophisticated. Typical for STAHLWILLE.

### 1 Good looking

The slanted top-mounted signs are effective eye-catchers and can be fitted and changed in seconds – thanks to the convenient magnetic construction.

You can find more details on the POS system in our special POS brochure – visit [www.stahlwille.de/broschueren-und-flyer/en/stahlwille-pos.pdf](http://www.stahlwille.de/broschueren-und-flyer/en/stahlwille-pos.pdf)

### 2 High-quality visual impact

All the base units of the POS system are in anthracite grey RAL 7016. This visual appearance emphasises the premium quality inherent in all STAHLWILLE tools. A further highlight (literally) is the integrated lighting.

### 3 Extensive range of accessories

The broad range of accessories available for the system makes it easy to fine-tune it on-site if needed. There are also specially designed holders for ratchets, extensions and many more items.

### 4 Quality round perforations

The perforated panels for attaching the product holders feature round holes. This avoids the visual distraction of the keyhole design found elsewhere.

### 5 Flexible storage space

Variable shelving and drawer elements are available to round off the presentation.
