

Easy-Mix PE-PP 50 Structural Acrylic Adhesive

transparent | for low surface energy plastics | for small bonding gaps

WEICON Easy-Mix PE-PP 50 is a 2-component construction adhesive based on methyl acrylate. Due to its transparent curing, it is particularly suitable for visually appealing, high-strength adhesive bonding of low surface energy plastics, such as PE, PP and TPE. Thanks to its special formula, the adhesive is suitable for zero-gap bonds and for connecting surfaces with extremely small bonding gaps of less than 0,2 mm. The structural adhesive has a fast strength build-up and a high final strength. It is impact-resistant, ageing-resistant, chemical-resistant, and slightly thixotropic. PE-PP 50 has a short pot life of six minutes and a processing time of twelve minutes. It is applied with a 1:1 system and does not require pre-treatment of the bonding surfaces, as the adhesive has an integrated primer. For the application of the Easy-Mix product, the Dispenser Easy-Mix D 50 is required.

Instructions for use

When using WEICON products, the physical, safety-related, toxicological and ecological data and regulations in our EC safety data sheets (www.weicon.com) must be observed.

Surface pre-treatment

Clean and dry bonding surfaces are essential for flawless adhesive bonding (e.g. cleaning and degreasing with WEICON Surface Cleaner). Smooth surfaces can be roughened mechanically.

Mixing

PE-PP 50 products can be processed straight from the double cartridge by means of the included static mixer. Dismiss the first 5 cm of the adhesive bead. The adhesive is applied to just one side. The specified pot life refers to a material batch of 10 ml at room temperature. Larger batch quantities will result in faster curing. Higher temperatures also reduce the pot life and curing time. (General rule: every increase by +10 °C above room temperature results in a decrease of the pot life and curing time by half). Temperatures below +16 °C increase the pot life and curing time significantly. From approx. +5C and below, no reaction takes place.
